In the Cloud

Acadiant Limited

02 January 2024

1   Acadiant's Modern Cloud Platform

1.1   A Modern Cloud Platform

The Acadiant platform is designed with cloud environments in mind, capable of efficiently operating across multiple availability zones. It is configured to integrate with any system, whether private or internet-based, given appropriate permissions.

Client access can be customized to an internal network, opened to the wider internet, or a mix of both. To ensure security, the Acadiant platform supports a range of modern authentication and authorization protocols.

1.2   Flexible Deployment Options

Thanks to Acadiant's full compliance with modern standards, our platform can be easily deployed into a public cloud, a private cloud within an enterprise, or subscribed to via a Software-as-a-Service model.

1.3   Multi-Tenant, Multi-Solution Services

All Acadiant services are multi tenancy by default Each Acadiant instance is designed to support any number of Acadiant solutions, enhancing the flexibility and scalability of your operations.
